

Trusted Global Leader in Underwater Defence

JFD Australia is a trusted leader in underwater life support, diving systems, submarine rescue and hyperbaric technologies, supporting defence and commercial operators worldwide. Backed by proven performance, global reach and deep technical expertise, JFD delivers mission-critical capability where failure is not an option.

Submarine rescue - rapid-response capability on a global scale

Defence diving - life-support systems engineered for the most demanding environments

Tactical delivery vehicles – optimised for mission profile

Submarine platforms – delivering critical capabilities for safe, effective submarine operations

Defence experience

Established in Australia in 2008, and strengthened through the merger of James Fisher Defence and Divex (2014) and the acquisition of Cowan Engineering (2018), JFD brings together decades of specialist knowledge with a strong sovereign presence. As a subsidiary of James Fisher and Sons plc, JFD draws on a 175+ year maritime engineering heritage, trusted by navies and operators across the globe. Operating in 80+ countries, JFD has set global benchmarks by: Supplying 4 of the world's 6 air-transportable submarine rescue systems. Becoming the largest provider of recompression chambers to allied navies. Sustaining long-standing partnerships with the Australian Defence Force's diving and life support programs. Our systems protect lives, assure readiness and strengthen undersea resilience.
