

Company Overview & Capabilities

Leonardo Australia represents the global capability of Leonardo S.p.A., a world leader in aerospace, Defence and security technologies. Headquartered in Port Melbourne (VIC) with sites in Essendon Fields, Fishermans Bend, Canberra and Rockingham (WA), Leonardo Australia provides sovereign solutions and through-life support across land, sea, air, space and cyber domains.

Core Capabilities

- > Helicopters: Assembly, maintenance, repair and overhaul of AW-series aircraft; full in-country support for more than 140 platforms across Australia and NZ.
- > Electronics: Radar, sensor and surveillance systems; meteorological radars; Maritime Communications, ANPR and SCADA systems for Defence, law-enforcement and infrastructure.
- > Cyber & Security: Secure network, data and communications systems aligned to Defence security standards.
- > Training & Simulation: OEM-authorized pilot and maintainer training; Level D AW139 simulator (ACE Training Centre).
- > Customer Support & MRO: 24/7 OEM-level maintenance for helicopter gearboxes, dynamic systems testing, and NDT services.

Certifications & Quality Systems

- > AS/NZS ISO 9001:2015 (Electronics)
- > CASA Part 145 (Helicopters MRO)
- > NATO AQAP 2310 Military Quality Standard
- > ESG-certified global operations | DJSI & MSCI 'A' rating

Key Programs & Customers

Leonardo Australia directly supports major Commonwealth programs and public safety initiatives through design, integration, training and sustainment.

Defence & Government

- > Bureau of Meteorology: Radar Modernisation Program (20+ radar sites nationwide)
- > Department of Defence: SEA1442 Phase 4 Maritime Communications systems support

Public Safety & Civil Agencies

- > Queensland Police Service: Automatic Number Plate Recognition (ANPR) deployment across QLD
- > WeBuild/PTA (WA): SCADA system for airport rail link operations
- > Toll/ACE Training Centre: Leonardo-approved helicopter pilot simulator training

Key Differentiators

- > Sovereign Capability: Local MRO, training and radar system integration with Australian-based technicians and infrastructure.
- > Global OEM Access: Reach-back to Leonardo's design authorities in Italy, UK and US ensures full lifecycle technical support.
- > Trusted by Government: Proven track record supporting Defence and public-sector programs cross air, sea and land domains.
- > Australian Industry Content: AU\$29.2M spent locally in 2024; commitment to ongoing AIC growth and Indigenous participation.
- > Cyber Security & Compliance: Secure hosting on Australian AWS infrastructure; compliance with ASD and DISP standards.
