

Reliable systems for mission-critical naval and defence applications

More than three decades ago, MacArtney entered the world-wide markets of defence contractors and navies. Our scope of deliveries represents all of our system groups and includes classified deliveries.

MacArtney provides turnkey solutions to the defence industry, supplying connectivity products, instrumentation, deck and over-the-side handling equipment, such as cables, sonars, and winches.

MacArtney has always had a strong set of values. Committing to sustainability we incorporate responsible purchasing, production and sourcing.

Our main defence operations cover various fields, including hydrography, harbour surveillance, coastal and fisheries inspection, submarines, and mine countermeasures.

Facilities and yards

- Test ranges
- Naval Shipyards
- Navies

Segments

- Connectivity
- Ocean Science/Research
- Marine & Offshore
- Defense/Security
- Service/Support

Research and development

- Institutes and laboratories predominantly funded by defence funds

Subsea detection

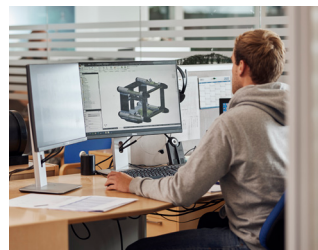

- Integrators
- Tier contractors
- Mine Countermeasures (MCM)
- Anti-Submarine Warfare (ASW)
- Unmanned vehicles/applications (AUVs and USVs)
- Critical underwater infrastructure (CUI)

Critical underwater infrastructure surveillance

ROTV system for detecting and classifying UXO (Unexploded Ordnance)

Single-source partner: in-house from concept to service

Subsea frames: versatile underwater instrumentation platforms

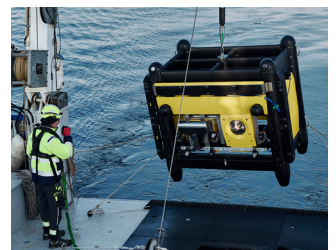

Side scan sonar system

Autonomously operating winches for naval application on USVs

Connectivity solution for navy vessel hydrophone array

Ideal sensor-agnostic platform for acoustic survey with payload options

Connectivity | Data acquisition | Workshop solutions | Service and training

MacArtney Group is a privately owned global market leader providing advanced technology products, systems, and integrated solutions for key industries such as marine and offshore, ocean science, and naval. Leveraging experience since 1978, we continue to meet market and client demands through insights, adaptability, a diverse range of off-the-shelf and customised solutions, and control over the entire supply chain. We have offices in APAC, Europe, the Middle East, and the Americas, complemented by an extensive distributor network worldwide. Approximately 500 employees.
