

## WA's ADVANCED MANUFACTURING HUB

SQP Engineering is a family owned and operated West Australian business providing additive and subtractive manufacturing solutions to industries such as mining, oil & gas, maritime and defence.

### CAPABILITIES

- CNC Turning
- 5 Axis CNC Milling
- 9 Axis CNC Multitasking
- 5 Robotic cells
- Additive manufacturing Composite & Metal
- Metrology

### DISCRIMINATORS

- 100% Australian owned
- Industry 4.0 factory
- DISP\*
- Temperature controlled metrology room utilising collaborative robots for high frequency dimensional reporting

### PRODUCT

- Subtractive manufacturing using Japanese CNC machines and robots
- Additive manufacturing using Markforged printers
- In house metrology using 5 axis CMM machines to generate dimensional reports

### KEY MARKET AND PARTNERS

- **Defence** – machined components used by RAN, RAAF and SAS
- **Oil & Gas** – Additive manufactured and machined components for subsea operations
- **Mining** – Geo survey and drilling tools

### CERTIFICATION AND ACCREDITATIONS

- DISP \*by April 2026
- ISO 9001 :2015

### ENVIRONMENTAL

- 90% paperless
- 30KW Solar power
- Recycled waste
