

# Modernising government services through stronger collaboration

## Digital Strategy for the Western Australian Government 2026-2030

### Vision

A digitally capable public sector, collaborating to deliver easy-to-use, smart and secure services

### How Digital Transformation Supports Government Priorities

#### Jobs

Digital skills, workforce growth, Innovation support

#### Health

Telehealth, secure data, better patient outcomes

#### Housing

Modern digital platforms, streamlined approvals

#### Communities

Cyber security, inclusion, connectivity and accessible digital services

#### Environment

Data-driven decisions, sustainability, community engagement.

#### Infrastructure and Services

State Digital Assets are critical economic infrastructure and increase the value of physical assets.

### Strategic Priorities

#### A digitally-empowered public sector, working together

1. State Digital Assets
2. Stronger collaboration
3. People and skills

#### Easy-to-use and inclusive Services

1. Improved services and transactions for people
2. Improved approvals and engagement with business
3. Digital inclusion

#### Smart decisions

1. Streamlined data sharing
2. Responsible use of AI and new technologies
3. Building data sharing and governance capabilities

#### Protected information and systems

1. Cyber security policies, standards and skills and continuous improvement
2. Continuous monitoring and threat intelligence
3. Rapid incident response and recovery

### State Digital Assets for Streamlined Service Delivery
