18. Interpreting zoning table

AMD 8 GG 7/1123

- (1) The permissibility of uses of land in the various zones in the Scheme area is determined by cross-reference between the list of use classes on the left hand side of the zoning table and the list of zones at the top of the zoning table.

(2) The symbols used in the zoning table have the following meanings -

- P means that the use is permitted if it complies with any relevant development standards and requirements of this Scheme;
- I means that the use is permitted if it is consequent on, or naturally attaching, appertaining or relating to the predominant use of the land and it complies with any relevant development standards and requirements of this Scheme;
- D means that the use is not permitted unless the local government has exercised its discretion by granting development approval;
- A means that the use is not permitted unless the local government has exercised its discretion by granting development approval after giving notice in accordance with clause 64 of the deemed provisions;
- X means that the use is not permitted by this Scheme.

- Note:
- 1. The development approval of the local government may be required to carry out works on land in addition to any approval granted for the use of land. In normal circumstances one application is made for both the carrying out of works on, and the use of, land.
 - 2. Under clause 61 of the deemed provisions, certain works and uses are exempt from the requirement for development approval.
 - 3. Clause 67 of the deemed provisions deals with the consideration of applications from development approval by the local government. Under the clause, development approval cannot be granted for development that is a class X use in relation to the zone on which the development is located, except in certain circumstances where land is being used for a non-conforming use.

(3) A specific use class referred to in the zoning table is excluded from any other use class described in more general terms.

(4) The local government may, in respect of a use that is not specifically referred to in the zoning table and that cannot reasonably be determined as falling within a use class referred to in the zoning table -

- (a) determine that the use is consistent with the objectives of a particular zone and is therefore a use that may be permitted in the zone subject to conditions imposed by the local government; or
- (b) determine that the use may be consistent with the objectives of a particular zone and give notice under clause 64 of the deemed provisions before considering an application for development approval for the use of the land; or
- (c) determine that the use is not consistent with the objectives of a particular zone and is therefore not permitted in the zone.

(5) If a use of land is identified in a zone as being a class P or class I use, the local government may not refuse an application for development approval for that use in that zone but may require works that are to be undertaken in connection with that use to have development approval.

- (6) If the zoning table does not identify any permissible uses for land in a zone the local government may, in considering an application for development approval for land within the zone, have due regard to any of the following plans that apply to the land -

- (a) a structure plan;
- (b) a local development plan.

19. Additional uses

- (1) Table 4 sets out -
- (a) classes of use for specified land that are additional to the classes of use that are permissible in the zone in which the land is located; and
 - (b) the conditions that apply to that additional use.
