

ADARSH AUSTRALIA

MANUFACTURING QUAD CHART

ADARSH AUSTRALIA

COMPANY OVERVIEW

Adarsh Australia is one of Perth's leading providers of **manufacturing and engineering services**. With a wide range of capabilities, Adarsh Australia has worked closely with **defence organisations for over 30 years**. Our teams collaborate closely with clients to truly understand projects and refine components in addition to offering strong support and technical expertise.

Machinery: 20x Okuma 4-axis mills, 5-axis lathes, bar feeders and more, Fanuc wire EDM, 15x industrial SLS, SLA and FDM 3D printers, overhead gantry cranes, coded Stick, TIG, MIG, and laser welding, Einscan HX 3D scanner and FaroArm, as well as other equipment.

APPLICATIONS & CLIENTS

Adarsh **designs and manufactures:** housings, frames, brackets, shafts, rollers, guards, gears, flanges, fittings, inserts, pulleys, enclosures, OEM replacements, recreations of undocumented components, parts for land, subsea, aerospace, and additional demanding environments, as well as various other products.

Clients include DoD, DoH, Austal, BAE, Raytheon, and Rheinmetall.

CORE CAPABILITIES

Core **manufacturing services** include: CNC machining, wire EDM, casting, forging, extrusion, injection moulding, 3D printing, as well as stainless and carbon steel pipe, aluminium, and structural steel fabrication. Our **engineering services** include: Design for Manufacturing (DFM), Computer-Aided Design (CAD), Finite Element Analysis (FEA), and reverse engineering.

KEY DISCRIMINATORS

- Over 30 years of sovereign manufacturing in Australia.
- Engineering and manufacturing with one local supplier.
- From prototyping and small-batch production through to economical, large-scale manufacturing.
- A wide range of capabilities with specialised staff for each.
- Ability to manufacture with common and exotic materials.
- An ongoing partner focused on long-term success.
