

CAPABILITY X

CORE CAPABILITIES

- Secure connectivity for remote and offshore assets
- Portable remote operations and command systems
- Computer vision AI for real-time situational awareness
- Integration of ISR, SAR, UAVs, ROVs and robotic systems
- Built on proprietary software and operating system
- Reliability of a prime, speed of a start up
- Highly experienced leadership and board with proven expertise and industry credibility

INDUSTRY AND DEFENCE EXPERIENCE

- Supports defence and critical infrastructure environment
- Enables ISR and SAR operations
- Deployable remote command capability
- Built for high-risk, mission-critical operations
- Winners at Robopalooza and IODS innovation finalists
- Used by: ASX 100 companies, Australian government agencies, Timor-Leste, Brunei

KEY PRODUCTS

Connect-High-reliability secure communication networks

Remote – Portable remote operations and control systems

Protect – AI-powered digital twin and safety monitoring platform

CX1 – Combines advanced connectivity, AI and remote operations to tailor a solution for you specific need
