

Discriminators

- Proudly 100% Australian owned and operated
- Sovereign Capability & Supply Chain
- Industry leading bespoke specialist engineering
- Rapid concept development and prototyping
- Six decades inhouse oilfield technical limit expertise
- Unique & innovative patented product line
- Pioneering advanced additive manufacturing
- Holistic full carbon lifecycle optimisation

Capabilities & Awards

- Advisory and engineering services
- Technical limit' concept design, prototyping/ production
- Efficient, on time and on budget engineering solutions
- 3D concept modelling and additive manufacturing
- Remote operations optimisation

Innovative Engineering Systems Design

Onetide is an Australian owned and operated engineering SME.

Through our technical limit proprietary engineering and sovereign AM capabilities we design, manufacture, and deliver our products for process optimisation in remote-energy, logistics and essential infrastructure, compliant with best practice quality and safety standards.

Our innovations in Remote-Energy, Maritime Logistics and Essential Infrastructure enable rapidly deployable full-cycle carbon optimization solutions for Defence, HADR, Resources, and Maritime applications.

We pride ourselves on demonstrating the measurable **SAFETY – TIME – COST – ROI** benefits of our innovative designs.

Quality Standards and Certifications

- DISP
- ISO 90001:2015
- ISO 14001:2015
- ISO 45001:2018
- DNV2.22

Key Customers & Partners

Key Products

MISSION DECK™
No weld sea fastening system for rapid logistics on vessels of opportunity in "one tide".

RAPID REEL™
Deployment, retrieval and storage system expediting shore power and flat fuel hose handling.

MOBILE MICROGRID™
Scalable, mobile, grid quality, hybrid renewable power supply.

UCS - MHU™
Modular husbandry unit & Mission Deck™ interface.
