

Seymour Whyte delivers complex infrastructure across live, secure and operational estates where continuity, security, safety and disciplined delivery are critical.

Founded in 1987, we are an Australian sovereign business that has grown to become a multi-award-winning national engineering contractor.

Backed by VINCI, a global leader in infrastructure, we combine local accountability with specialist expertise to deliver technically complex projects with confidence.

CAPABILITIES + DISCRIMINATORS

Technical capability:

- Functional buildings and utilities (telecoms, electrical, water, and wastewater).
- Infrastructure: earthworks, roads, bridges, rigid concrete and flexible pavements, drainage, dams, and retaining structures.
- Airports, ports, and marine infrastructure.
- Fuel infrastructure and pipelines.

Delivery models

- Tier 1 contractor capability and financial strength, with Tier 2 agility
- Managing contractor.
- Design and construct, alliances, construct-only, guaranteed maximum price (GMP), early contractor involvement (ECI) and collaborative contracts.

Defence relevance

- DISP-accredited, Defence-ready contractor with mature security systems, and experience in secure operating environments.
- Proven delivery in secure, operational and environmentally sensitive environments.

KEY CUSTOMERS + PARTNERS

- Department of Defence:
 - Security and Estate Group
 - Defence Delivery Agency
 - Naval Shipbuilding and Sustainment Group (NSSG).
- Australian Naval Infrastructure: Nuclear-Powered Submarine Construction Yard (NPSCY).
- Western Sydney Intl. Airport: landside civil and building works, roads, bridges, utilities, and support infrastructure for telecoms, water and wastewater.
- Transport for NSW: Sydney Gateway, a \$2.6bn motorway connection to Sydney Airport, including 19 bridge structures, utilities and contaminated material treatment and reuse.
- Melbourne Water, Sydney Water, Port of Melbourne, Port of Brisbane.

Key partners

- VINCI Construction: access to specialist capability across geotechnical, nuclear, energy, digital and Defence-related infrastructure disciplines.
- Joint ventures, and alliances with other Australian civil contractors and designers / consultants.

PRODUCT / TECHNOLOGY / OFFER

- Defence Infrastructure Panel - Major Construction participant, accredited to support projects valued over \$200m across all states and territories.
- Defence-relevant scope: heavy civil, airfields, maritime structure, fuel / utilities, environmental and UXO remediation, GWEO-related infrastructure, munition-manufacturing facilities, and nuclear-regulated facilities.
- Best suited to Defence estates requiring disciplined delivery, operational continuity and secure project controls.

QUALITY STANDARDS + OTHER ACCREDITATIONS

- ISO-certified Quality, Environmental and Safety management systems.
- ISO/IEC 27001:2022 information security management certification.
- Federal Safety Commissioner (OFSC) accreditation.
- DISP accreditation.
