

TRIDENT AUSTRALIA

DEFENCE CAPABILITIES

Trident Australia is your trusted partner in delivering high-performance, high-reliability solutions for fluid and gas systems across industries including defence, energy, mining, and infrastructure.

From major infrastructure projects to offshore operations, our people, facilities, and systems are built around one promise:

'What you need, when you need it.'

QUALITY STANDARDS

- AS/NZS ISO 9001:2015
- ISO/IEC 17025: 2018
- DNV Certified and tested Hose Assemblies
- NATA accredited calibration laboratory and testing area
- Member of the Henderson Alliance
- DISP - In progress

SERVICES / CAPABILITIES

- Repair Agents - Hydraulics
- DNV and NATA Certified Hose Assemblies
- Calibration and pressure testing services
- Large and small bore hose flushing
- Precision tube and pipe bending spoils
- Custom control systems, HPU's and fluid power builds
- Field service technicians
- Feed and full design life engineering including manufacturing and fabrication
- Supply certified hydraulic parts and hire equipment, supported by partnerships with industry recognised quality brands.
- Installation, commissioning, upgrades and sustainment support

COMPETITIVE ADVANTAGES

- 27+ Years of experience in hydraulic control systems installations, repair, modifications and testing.
- 27,000 sqm facility, in Canning Vale, WA complete with overhead cranes and 70 sqm test bay engineered for safe hydrostatic pressure testing.
- Experienced team of hydraulic technicians, fitters and engineers available to support field service and sustainment activities.
- Maintaining high inventory levels (\$6m AUD plus) of product and components to ensure seamless support, eliminate lead times and project down time.
- Engineering support team in place to provide solutions, successful execution and address technical requirements.
- Proven track record collaborating with multiple contractors across mining and energy to deliver complex projects on time and to specification.
- Backed by global parent company **R5 Components**, providing Trident Australia with the supply chain strength, technical resources and rapid access to critical parts.
- National footprint with facilities in Perth (WA) and Mentone, Melbourne (VIC). Supporting programs across both coasts.
