

CURRENT RESPONSE:

Level 2 under WA's State Hazard Plan

Bird flu tests undertaken:

This fortnight:	36
Since 19 June:	606

Positive bird flu cases:

This fortnight:	0
Since 19 June:	10

- There have been no additional positive cases this fortnight.
- All previous detections in Western Australia have been in migratory seabirds.
- The [WA Action Plan for H5 Bird Flu](#) has been published, outlining the phased approach and activities to prepare for and respond to the long-term establishment of H5 bird flu in Western Australia.
- The third Bird Flu Wildlife Advisory Group meeting was held.
- The South West's first dedicated wildlife hospital [has officially opened](#) in Margaret River, with final preparations being completed ahead of full service delivery on 12 November.
- WA Health continues to monitor the situation, and the risk to humans remains low.
- Thoroughly prepared chicken meat and eggs are safe to eat.
